-----  
**BEEKEEPING 101 WORKSHOP**

Led by beekeeper Jane-ellen Malinowksi, this workshop will seek to answer all new and prospective beekeepers' questions about what it takes to get successfully started in beekeeping: a little bee biology and behavior, different beekeeping methods, a brief history of beekeeping, the basic equipment needed, site selection, where to obtain your first honeybees and beekeeping gear, and what is all of this going to cost? Even if you may not be ready to get started, come and learn what's involved! Beekeeping equipment catalogues will be available to all participants, and we'll even have a few fun door-prizes!
